Per Capita Personal Income Data

The Bureau of Economic Analysis (BEA) is the federal agency responsible for compiling personal income and per capita personal income estimates for the nation, states and areas. Per capita personal income (PCPI) is the annual sum of all resident income in a geographic area divided by the number of residents in that area, as of July 1 each year.

Personal income includes three major components:

- ✓ Net earnings by place of residence (examples: wages and salaries, employer contributions to pensions and insurance, proprietors' income)
- ✓ Dividends, interest, and rent (examples: interest income, corporate dividends, rental income)
- ✓ Personal current transfer receipts (examples: retirement and Medicare benefits, income maintenance programs, unemployment insurance benefits)

The BEA typically releases preliminary state and national PCPI estimates for the prior year in March, and revised state and national PCPI estimates for the prior three years in September. A benchmark estimate of state PCPI for the years 2001-2012 is scheduled for release September 30, 2013. Preliminary and revised county-level estimates of PCPI for the prior three years are typically released in November.

For more PCPI statistics from across the nation, visit the BEA website, www.bea.gov.

For a thorough analysis of PCPI in Oregon and how it compares with the nation and other states, see the OED report *Why Oregon Trails the Nation: An analysis of per capita personal income*, available on www.QualityInfo.org.
