Portland Metropolitan Area: June 2020

The Portland metro area's unemployment rate declined to 11.2 percent in June from 14.2 percent in May. June's rate is similar to the national rate of 11.1 percent. Approximately 154,000 area residents remain unemployed.

The Portland region's total nonfarm payroll employment rose by 37,200 jobs in June, following a gain of 8,500 jobs in May (seasonally adjusted). Over the past two months, employers added back over a quarter of the jobs lost in March and April.

The largest over-the-month job gain by far was in leisure and hospitality, the sector of the economy hardest hit by pandemic-related closures. Employers added 20,700 jobs in June, for a two-month total of 28,900 jobs; recovering 42 percent of COVID-19 losses in March and April.

Construction is the only major industry back to March employment levels, the month when most industries started suffering the impacts of COVID-19. That said, this industry typically adds between 3,000 and 4,000 jobs between March and June, so a return to March levels isn't a return to normal.

'Other services', an industry that includes hair and nail salons, gyms, and other personal care businesses that were forced to close due to public health concerns, added 4,100 jobs over the past two months, recouping over half of COVID job losses. Ambulatory health care (e.g. doctor and dentist offices) and retail trade have also regained a large share of lost jobs; 66 percent and 43 percent, respectively.

Every large metro region across the nation has lost jobs during the pandemic. Portland's four-month rate of decline (-9.2%) ranks 23rd steepest among the nation's 50 largest metro areas. Oklahoma City, San Antonio, Phoenix, and Dallas reported job losses of 5 percent or less, while New York City, Boston, and Las Vegas had the steepest.

Next Press Release

The Oregon Employment Department will release the Portland metropolitan area's unemployment rate and employment survey data for July on Tuesday, August 25.

The Oregon Employment Department and the U.S. Bureau of Labor Statistics (BLS) work cooperatively to develop and publish monthly payroll employment and labor force data for Oregon's metropolitan areas and counties. The estimates of monthly job gains and losses are based on a survey of businesses. The estimates of unemployment are based on a survey of households and other sources.

The Oregon Employment Department payroll employment estimates are revised quarterly using information from unemployment insurance tax records. All department publications use data from this *official Oregon series* unless noted.

The department also makes the BLS-produced nonfarm payroll employment series for metropolitan areas available. These are revised annually by BLS.

The most recent month is preliminary, the prior month is revised. Prepared in cooperation with the U.S. Department of Labor, Bureau of Labor Statistics.

Civilian labor force includes employed and unemployed individuals 16 years and older by place of residence.

Employed includes payroll employment, self-employed, unpaid family workers, domestics, agriculture, and labor disputants.

Unemployment rate is calculated by dividing unemployed by civilian labor force.

Nonfarm Payroll Employment: Official Oregon Series. Data are by place of work and cover full- and part-time employees who worked or received pay for the pay period that includes the 12th of the month. The data exclude the self-employed, volunteers, unpaid family workers, and domestics.

The Portland-Vancouver-Hillsboro metropolitan area includes Clackamas, Columbia, Multnomah, Washington, and Yamhill counties in Oregon, and Clark and Skamania counties in Washington State.
