

Mid-Valley Economic Indicators—Linn County

Linn County's economic recovery slowed in September. The seasonally adjusted unemployment rate in the county was 8.1 percent, matching the August revised unemployment rate. Total nonfarm employment (not seasonally adjusted) improved 0.3 percent from August, but is down 4.7 percent looking at the period of September 2019 to September 2020.

This month, there are two Graphs of the Month. The Monthly Unemployment Rate graph shows the pace of improvement in the unemployment rate slowed over the past month. The National Long-term Unemployment graph shows an increase in the number of long-term unemployed (measured as those unemployed for 27 or more weeks). The two graphs taken together paint a picture of a possible slowing in the employment recovery.

For more information and/or to be added to the monthly e-mail distribution list, contact:
