Linn County’s economy continued to recover in October. The seasonally adjusted unemployment rate in the county was 7.0 percent, down from the September revised unemployment rate of 8.3 percent. Total nonfarm employment (not seasonally adjusted) improved 0.2 percent from August, but is down 7.1 percent over the past year.

National Long-term Unemployment is once again our graph of the month. This graph shows a continued increase in the number of long-term unemployed (measured as those unemployed for 27 or more weeks). This trend may indicate damage to employment that will take longer to repair.

Finally, I have also included a holiday pie chart. According to data gathered by Instagram, cranberry is the most popular pie this holiday (including in Oregon).
The Salem MSA’s economy continued to recover in October. The seasonally adjusted unemployment rate in the Salem MSA was 6.8 percent, down from the September revised unemployment rate of 7.8 percent. Total nonfarm employment (not seasonally adjusted) improved 1.5 percent from August, but is down 6.1 percent over the past year.

National Long-term Unemployment is once again our graph of the month. This graph shows a continued increase in the number of long-term unemployed (measured as those unemployed for 27 or more weeks). This trend may indicate damage to employment that will take longer to repair.

Finally, I have also included a holiday pie chart. According to data gathered by Instagram, cranberry is the most popular pie this holiday (including in Oregon).
Yamhill County’s economy continued to recover in October. The seasonally adjusted unemployment rate in the county was 6.0 percent, down from the September revised unemployment rate of 6.8 percent. Total nonfarm employment (not seasonally adjusted) improved 0.9 percent from August, but is down 8.7 percent over the past year.

National Long-term Unemployment is once again our graph of the month. This graph shows a continued increase in the number of long-term unemployed (measured as those unemployed for 27 or more weeks). This trend may indicate damage to employment that will take longer to repair.
