# Rogue Valley Economic Overview:

**Jackson County** 

June 2025

#### **Special Topic: Workforce Age Distribution**

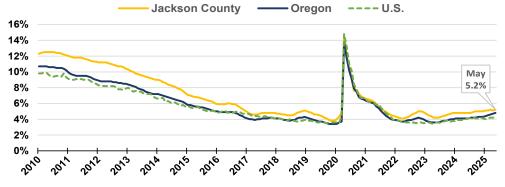

Jackson County's workforce has been trending older over time. The number of workers age 55 and older nearly quadrupled from 4,956 to 19,635 over this 32 year period. Their representation in the workforce has more than doubled, increasing from 11% to 25%. Workers in this age cohort have continued to participate in the labor force longer than previous generations. The less than 25 age cohort has remained relatively stable.

This has real implications for the future of the workforce as those in the older age cohort retire. With younger workers comprising a smaller proportion of the workforce this could lead to increased turnover, upskilling needs, and strains on the healthcare system.

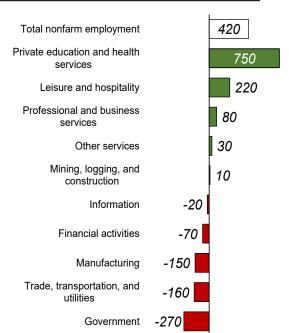

### **Unemployment Rate at 5.2%**

- The unemployment rate in May 2024 was 4.8%
- The unemployment rate has ranged from 4.8% to 5.2% over the year
