Industry Growth in Real GDP, Multnomah County: 2020-2021

Source: U.S. Bureau of Economic Analysis

Multnomah Real GDP Rebounded by \$4 billion in 2021

GDP counts all of the output generated within the borders of a country or geographical area and also includes some nonmarket production, such as defense or education services provided by the government. GDP is important because it gives information about the size of the economy and how an economy is performing.

During the recent recession, Multnomah County's GDP fell by \$2.97 billion, a loss of 4.8% from 2019 to 2020. In the following year, the county rebounded, increasing its GDP by \$4.0 billion from 2020 to 2021.

In 2021, total GDP reached \$62.5 billion in Multnomah County which was the highest GDP of Oregon's 36 counties. Four broad industries provided 70% of growth in GDP from 2020 to 2021: arts, entertainment, and recreation (\$871.2 million); government (\$822.2 million); wholesale trade (\$609.4 million); and finance, insurance, and real estate (\$524.3 million).
