[CAREERS ACTIVITY GUIDE]

A series of activities and exercises designed to help students explore the Oregon Careers 2024 publication.

The Oregon Employment Department (OED) is an equal opportunity agency. OED provides free help so you can use our services. Some examples are sign language and spoken-language interpreters, written materials in other languages, large print, audio, and other formats. To get help, please call 800-262-3912. TTY users call 711. You can also send an email to <u>Imipubs@oregon.gov</u>.

Careers 2024 Activity Guide

The Careers 2024 Activity Guide is an excellent tool to help students explore Careers. Each easy-to-understand activity is tied to a particular section in Careers.

Teacher's Guide A Teacher's Guide to the Activity Guide is available by sending an email to Jason Payton at Jason.M.Payton@employ.oregon.gov. Please put "Teacher's Guide" in the subject line and note what school or organization you work with. You will receive a document with the answer key to exercises in the Activity Guide.

Exercise 10: Research an Occupation (Online Activity)

Explore career options by following these steps.

- Go to <u>https://www.qualityinfo.org</u>. In the <u>Occupational Profiles tool</u>, type a job title you are interested in. You can use the list of occupations on pages 43-62 to help identify career titles. Keep it simple the search will work better if you use simple terms or keywords. Click the Search arrow or press enter.
- 2. Click on the Search icon on the right side of the screen to explore the Matching Occupations. Expand the dropdown list for a complete list of job titles that match the keywords you typed and select one. If none of these occupations sound appealing to you, choose a different career keyword and click on Search again.
- 3. Using the expandable filters on the right, make sure the report type is set to "Full Report" and the area is set to "Oregon." Click "Get Report."
- 4. Scroll down to the section titled "Schools and Training Providers." If there are any colleges, Job Corps centers, or other training providers listed in this section, go to #5 below. If there are none listed, choose another occupation until you find one with training providers listed, then go to #5 below.
- 5. Use the Occupational Profile to complete the following:
 - a. Occupation title:
 - b. How many current job openings are there? ______
 - c. Is there a state license associated with your selected occupation? If yes, indicate the license.

3. Were there any differences between the two schools that surprised you? Explain.

Exercise 13: Finding Resources

- 1. Define the minimum wage.
- 2. What is the current minimum wage in the county in which you reside?
- 3. What is the minimum wage in the county in which you reside in July 2023, and how will it change in July 2024?
- 4. Assume you work full time and you are paid the minimum wage. Calculate your monthly and yearly gross income.
 - a. Multiply the minimum wage by 174 hours to find your monthly gross income (there are an average of 174 work hours in a month if working full-time).
 - b. Multiply the minimum wage by 2,080 hours to find your yearly gross income (there are an average of 2,080 work hours in a year if working full-time).
- 5. List three online resources that can help you explore careers.

a.	
b.	
c.	

Exercise 14: Budget Planning

This exercise can help you identify where your income will go, and help you understand how much you will need to earn to pay your expenses. For this exercise, we are assuming 25 percent of your wages will be deducted to pay taxes.

The budget sheet on page 41 provides an approximate low, medium, and high amount for each expense. If you have a roommate, and are frugal, your expenses may tend to fall into the low category. If you are less frugal, perhaps live on your own, enjoy eating out and generally spending more money, your expenses may fall into the high category more often.

- 1. First, select an occupation and look up its more experienced wage in the Career Guide (pages 43-62).
- 2. Multiply the hourly wage by 174 hours to find your monthly gross income (the average hours in a month when you work full time is 174 hours).
- 3. Calculate your net monthly income.
- 4. Estimate how you may spend your money on a monthly basis by entering the amount you think you'll spend on each expense category. A low medium high range is provided on page 41 for each expense. You can use an amount other than those listed if you have information about a particular expense.
- 5. Finally, add up your expenses and subtract the total monthly expenses from your net monthly income.
- 6. If the difference is greater than \$0, your income is enough to pay your expenses. If it is less than \$0, your expenses are greater than your income and you need to adjust your expenses and savings until they are equal and your budget is balanced. If you are not sure how much your expenses may be, you can search the internet or ask your family for assistance to estimate expenses.

Monthly gross income Taxes (monthly income x 0.25) Net monthly income (monthly gross income - taxes)										
						Expenses per Month	Low	Medium	High	Your Expenses
						Rent or home mortgage				\$
Utilities (electricity, water, cable, internet, etc.)				\$						
Phone				\$						
Food - eating at home				\$						
Food - eating out				\$						
Entertainment and recreation				\$						
Clothing				\$						
Car - payments, gas, maintenance, insurance, etc.				\$						
Public transportation				\$						
Healthcare (insurance, doctor visits, supplies)				\$						
Personal care (toiletries, haircuts, etc.)				\$						
Student education loan payments				\$						
Miscellaneous (pet food and care, donations,				\$						
gym fees, anything else you can think of)										
Savings				\$						
Total monthly expenses				\$						
Difference (net monthly income - monthly expenses)				\$						

Exercise 15: Budget Planning Reaction

The difference between an expected budget and how much a person can actually afford to spend can be shocking. Consider your calculations in this exercise and respond to the following questions.

1. Are there any expense categories where you may have under-budgeted (or inserted an amount that is probably less than the actual expense amount)? If so, what are they? Do you expect to have any expenses that are not included in the worksheet?

Under-budgeted

Expenses not included on worksheet

2. Would you easily be able to cover the monthly expenses of your expected budget with the net monthly income of your chosen career? If not, what are some ways you could reduce your expenses to be able to work in the career of your choice without having financial difficulties?

- 3. Find your chosen career in the Career Guide (pages 43-62) and look at the wage for less experienced workers. Does it differ significantly from the wage for more experienced workers? How might this affect your budget early in your career?
- 4. Would you be willing to change career paths in order to earn enough money for your budget, or would you prefer to modify your budget in order to work in your preferred career? Why?
